

Dating KPIs

The Christmas present for clients who have everything except a sense of humour about their own industry.

A comic novel about an M&A banker in London who runs his love life like a deal: funnels, due diligence, a term sheet, a ghosting index and, finally, a Deal Score from 0 to 100. His model rates everyone. Then someone rates him. Then a primary school teacher marks it in red.

for bankers, consultants, lawyers and private equity
